THE finer details

Each home has been thoughtfully designed and built to a high specification. Internal living areas provide a light and welcoming environment and integrated energy-efficient appliances are included as standard.

EMBRACE *modern living*

The emphasis on high specification extends throughout the entire home, from the meticulously designed kitchens, to the elegant en-suites and bathrooms.

Our double glazed uPVC windows and aluminum bifold patio doors ensure that you are provided with both style and energy efficiency.

Whether you seek a haven for relaxation or a stylish space for entertaining, these elegantly detailed homes set a new standard for contemporary living, allowing you to elevate your lifestyle.

PASSIONATE
about sustainability

We prioritise environmental preservation and are working to improve the eco-friendly features for this location.

Air source heat pumps have been introduced for renewable energy reasons. These pumps extract heat from outdoor air and transfer it indoors, even in colder temperatures. They are an efficient and eco-friendly way to heat homes by harnessing energy from the surrounding air.

To support wildlife, we've strengthened existing hedgerows with native species and limited lighting along Little Green Lane to maintain a bat-friendly environment. Insect-friendly habitats, including insect hotels, have been created throughout the development to provide safe shelters for local species. These hotels attract bees for pollination and other creatures to promote a healthy ecosystem. In addition, provision has been made to all houses for future installation of electric vehicle charging points.

ENHANCING *biodiversity*
